"WHAT ARE THE DUTIES OF CHURCH MEMBERS TO THEIR PASTOR?" Church members owe many sacred and obligatory duties to their pastor, to pay the pestor. which they cannot neglect without prejudice to the cause of Christ, and their own spiritual benefit. subject now under consideration "What are the duties of church members to their pastor?" This subject is one of vital importance. It should be the ruling desire of every member's heart, to know his or her duty. But, alas! we are fearful it has not passed the surface of the heart in the majority. Let us take the answer from the Word of God. May we ask our brethren and sisters to examine the Word for themselves, that a new interest may be awakened among all the churches in relation to those much neglected duties. We will make three divisions of this subject-first, Prayer; secondly, Honor; thirdly, Support.

THIRTY-SIXTH SESSION BEGINS OCTOBER 1st, 1878.

/ ORALITY, INDUSTRY, AND SCHOLARSHIP have given extended reputation to the College

HEALTHFUL CLIMATE, AND REFINED COMMUNITY fully eppreciated by all who know the place and people.

EDUCATION MADE THOROUGH, PRACTICAL, COMPREHENSIVE, AND ECONOMICAL:

1.-THOROUGH AND PRACTICAL by the peculiar methods of instruction, and by the 5.50 4.25 skill and fidelity of the professors. 4.75

2.-COMPREHENSIVE by the liberal courses of studies presented.

3.-ECONOMICAL by the moderate charges, and by the rapid progress in studies secured industrious habits of students and laborious attention of professors. 5.75 5.7

THE SCHOOL OF ENGLISH AND ORATORY .- Other schools are elective, but this is required. The course not only includes grammar, rhetoric and logic, but goes much farther; and by daily exercises in essays, orations, and other compositions, the pupil 4.75 is trained rapidly to elegant and forcible expression. Daily drill on the rostrum in parliamentiary law, gesticulation, and elocution, makes graceful speakers, and expert presiding officers. A course so comprehensive and practical demands great labor and care on the part of the professors; but only in this way can the pupil be well trained.

THE SCHOOL OF LATIN AND GREEK-Is celebrated, for the philosophical method of the professor, which makes the acquisition of the languages easier, more expe-ditious, and more thorough. The professor's discoveries in philology make a few simple principles explain the many difficulties.

THE SCHOOL OF MODERN LANGUAGES .- These studies are made a pleasre rather than a burden by the peculiar method of the professor, who makes the student feel as though he were travelling in Europe. A shorter time than usual gives a command of these languages and awakens an interest in their literature which leads to continued osecution of the pleasant and profitable work.

THE SCHOOL OF CHEMISTRY AND NATURAL HISTORY .- By study of ext books and individual observations, the students deliver lectures and perform experiments. They are thus prepared for active work in the chemical laboratory, in the field, or in the professions.

THE SCHOOL OF PURE AND APPLIED MATHEMATICS .- In pure mathematics, much importance is attached to original work. Mathematical reasoning power is most esteemed. In applied mathematics the use of instruments, the field work of the engineer, the calculations of the machinest, and the observations of the astronomer, claim special attention.

THE BUSINESS SCHOOL .- A thorough course of commercial mathematics, commercial law, penmanship, and book-keeping, qualifies young men for profitable positions in stores and counting houses. The plan of teaching is by actual business transactions as in best commercial colleges. Besides the advantages of this complete and thorough business course, the student can also take, without extra charge, one or two other schools, and ecome not only a business man but an educated gentleman.

THE SCHOOL OF ENGINEERING .- The plan of instruction in this school not only makes good engineers, as attested by success of the pupils, but it makes good esti-mators and successful men in domestic pursuits. The student is trained from the first to erve closely, calculate accurately, and construct skillfully THE SCHOOL OF MILITARY ART AND SCIENCE-Is supplied with arms and equipments to give military exercise and training to such students as may desire its advantages. Both the theory and art of war are taught, and those who take the course are qualified to take rank with the best officers. THE SCHOOL OF LAW .- This course of instruction consists of regular readings of text books, recitations, lectures, and moot court practice. The students of law are not subject to college discipline. The graduates of law receive the degree of L.B., and will be qualified to practice before the supreme and other courts of the State.
