I think all the cultivators in operation that you have introduced in this section, and think the Brown much superior to any other. It</p>

commending it as a first-class implement.
Respectfully,
JOEL GINSON.

SELMIA, JAN. 16, 1888.

MR. C. YOUNG, Dear Sir,—I am well,
and pleased with the Brown Cultivator, and will
freely recommend it to any one who de-

son. You have only to take them to the field,
to convince the practical farmer.

Respectfully,
J. H. MINGE.

MARION JUNCTION, JAN. 16, 1888.

C. YOUNG, Esq., Dear Sir,—I feel that it
would be difficult for me to say too much in
praise of the Brown Cultivator. I have seen
great labor saving machines, but they are
not so simple and easy to use as the Brown
two mules with one. Brown Cultivator,
and do fully as much work in cultivating as three
mules and three mules with three plows in the
old way. I have cut corn, with the Brown
Cultivator. I have plowed corn, with the
high with them. Respectfully,
J. H. MINGE.

Mr. C. YOUNG: I have used the Brown
Calibrator and think it superior to any I have
used. Its simplicity makes it very valuable
and convenient.

Mr. C. Young: I am highly pleased with the Brown Cultivator I purchased of you last year. I have had two and two mules can do the same work with the Brown Cultivator that three hands and three mules do with the old way. An average of three men and cultivate sixty acres in corn with one. The machinery is so simple and readily adjusted that it can be used successfully by any person of common sense. Yours, truly,
B. J. FORT.

BROWN'S STATION, May 19, 1894.

MR. C. YOUNG: Dear Sir,—I have been
on my neighbor Will John's farm and
have seen your Cultivator and worked with
it.

MR. C. YOUNG: Dear Sir.—This is to say
that we liked the Brown Cultivator last sum-
mer, and it proved to be a good horse. One
man and two mules with this cultivator will
do the work of three men and three mules
with plows in the field, and save the cultivation
of corn and cotton. Truly

own hands, and have concluded I am to do about the cost price of it next fall. I am still similarly situated to our distant relatives who was raised up in a cave with a mail until he was twenty-one years old, and coming out one morning he met a girl—swore and vowed he had been dreaming

three hands, three mules, and three plays in the ordinary way. Respectfully,
J. L. BROWN.

CANTON, Miss., Jan. 16, 1882.

Mr. C. YOUNG, Dear Sir.—I send the Brown/Culbuck last year, and found it to be a great labor-saving power. One hand to

N. E. ORRICK & CO.
SHIPLEY'S MILL, ALA., Jan. 1882.

Mr. C. YOUNG, I have used your Brown Cultivator capstan, and am well pleased with it. I think it a great labor saving machine. It is very simple and durable. One spring, in the cultivation of corn and cotton, it gives entire satisfaction and is what you recommend it to be—a first-class cultivator, labor-saving in coloring it as a great labor-saving machine.

Yours respectfully,
JOSHUA ALEXANDER.

SELMIA, ALA., Jan. 17, 1882.

MR. C. YOUNG: The Brown Cultivator which I purchased from you last spring gave me very satisfactory results. I have raised cotton and corn on it, and have several other makes of work, but the Brown, I think, is the best.

MR. C. YOUNG: I used the Brown Cultivator last season and it gave me very satisfactory results. It was used continuously during the season in plowing cotton and corn on black prairie land, and did far better work than any other implement I have used. It was done by some plowmen with whom I did business.

Respectfully, _____ A. D. SMITH, _____ W. B. SHIELDS, _____ Yours, _____ S. W. JOHN.

The demand for the BROWN CULTIVATORS last season far exceeded my expectations, and I could not fill all the orders that were sent me. I now have on hand a good supply and am prepared to fill orders promptly, for either RIDING or WALKING CUT-YOBS. I also carry a full line of Agricultural Implements, viz:

JOHN DEER, Colchester Black Land Plows, Green Milled Plows, Gilpin Sucky Hoes, Hughes Sucky Hoes, McCormick Reapers and Mowers, Sucky Hay Rakes, Thomas Sucker and _____

Cross Cotton Planters, Gilson Cotton Planters, Atlas Steam Engines, Pratt & Collis Pumps, Standard Distributors, Presses-Coleman's Friction Gearing Cotton Press, Ross Power Press, Alabama Cotton Gin, Deering Dental Support Gun Drivers, all religious rights.

I call particular attention to the CROSS COTTON PLANTER, which is one of the best Planters on the Market. It is a 4-horse power, works, drops the seed and covers, and is so cheap as to be within the reach of all. PRICE COMPLETE, \$8.00.

In offering this plan to the farmers of this South, I will simply state a few facts in reference to its practical working in the field, derived from actual experiment. I have used this plan on my farm in Shelby Co., Ala., for the past two years. I have seen it thoroughly with other sully plows, and will say, unhesitatingly, that for lightness of draft, ease of management, and thoroughness of work, I believe it has no equal.
