VOLUME 12.

Education and Scholarship. The words are not synonyms. Dif fering in primary meaning, they represent thinks which are also different though intimately related. Their relation to each other may be illustrated somewhat in the following expressions: Wisdom and knowled strength and skill, so also educated and scholarly. The term cultur though resting under a sort of literary opprobrium in some circles, expresse the true idea of education, in which the mind, like prepared and fertilized soil, is made productive. Scholar ship demands a change in the figure and represents the educated mind a

work, exercising its growing faculties ing out and appropriating to itself the products of others, and displaying its skill in the utilization of the garnered stores. Scholarly culture represents not adequately or comprehensively, yet with definiteness and correctness, the double idea of our head line,education and scholarship. Without insisting upon a universal observation of this distinction, we do earnestly protest against the loose and indiscriminate use of these terms, so common among us. They are frequently applied where they should not be-applied, where to apply them is to degrade them, to blot out their difference in meaning, and to undervalue what they fitly represent. They are noble words, representing each a noble sphere, and should not in common usage be displaced, especially thinking or to utilize the learning of the living vegetable organism sent to not by those professing to be educaothers. Possession of both gives the it in the form of a rootlet. Here 'ted and scholarly. In the hope of a more correct use of these two terms of the schools, we offer a few observations upon the basis of what has already been said Education is a development, scholarship an attainment. This distinction, founded upon the meaning of the words themselves, goes right to the bottom of the matter, and is sustained by all the authorities at our command. Education has to do with The mind is educated, and in mind. its education is developed; unfolds itself, as the bud unfolds and opens from without and mysterious powers from within; all its faculties and forces are led out, marshaled and drilled, mastered and mastering. The culture of the mind is its unfolding, training and enrichment. Only secondarily, as a means to an end, does education contemplate either the communication or the acquisition of knowledge, but rather "the discipline of the intellect, the establishment of the principles, and the regulation of the heart," and the fixing of the character. Education builds the house and entrusts its furniture to another. Scholarship has to do with schools and books, with letters and sentences, with grammars and literature. It is learning, schooling, acquisition. It marks the qualities of 'a scholar, denotes a man's attainments in science or literature, and represents the wellordered furniture of a well educated mind. The distinction is real and essential, not fanciful or conventional. Education makes one able to think scholarship gives one the power to express his thoughts. The expansion of the mind, the development and discipline of the intellect, both enlarges its receptive capacity and increases its ability to think. But what is the worth of thought or the augmented power of thinking, without the additional power of expression? What are the rich stores of the mind worth. if there be no outlet? When thought stir within us, we want words and language and learning When there is fire in the mind, we must have an escape flue for sin and heat and blaze. Steam genera the boiler nust be led along the lines of movement in the machinery. The best scholarship, other things being equal, will give the best

Troubles in Saltill

I feel that a brief statement of our present trouble about our church uilding in Saltillo is due the denomination, as the matter may now be prolonged beyond our first expectations.

The site is what was intended for a grand Catholic temple, which was never completed. When the church property was confiscated, this with its appurtenances was ceded to the State of Coahuila, for the purpose of common school instruction. Numerous lots have been sold to different indi viduals who have

all denounced a few years since by a Mr. Sanchey, who believed that the grounds could not be legally sold and that the State, having misappropiated them, they had reverted to the federal government, and could be "located" as such.

The answer came from Mexico, that the State was capable of deciding whether they should apply the lands directly to free school purposes or sell them and apply the money. So the suit was thrown out of court.

The large, unfinished temple was sold to a stock company once for the purpose of converting it into a theaits adornment, the ability to think the mineral impassable. If it gets last January, for two thousand dolwithout the power to command the over, it must be carried in the hand of lars. It was also stipulated that unless we should put a school building on a portion of the lot we should pay rounded man, introduces him to the then, young man, we find in nature another thousand dollars.

They are the men who sin against the whole light of plain duty, especially if he be an intelligent American citizen trained in the church; such a man takes pains not to know or think what ruin he is bringing on souls, on society. Let Christian society regard him as worthy only of reprobation,-Rev. Dr. Burrows, Chicago.

Dear Editor: In a recent issue of the ALABAMA BAPTIST, appeared a letter from Bro. B. F. Riley, stating that a young lady had recovered from an injury, who claimed the cure to have been wrought by faith and prayer. Now, I want to say just a few words about such a claim. I want to say that I do believe that prayer made to God in faith will work a cure for any sickness incident to us in life. To disbelieve the promises of God is to deny him. To discredit one portion of his Word, is to throw doubt upon the whole Scriptures. Some argue that the days of miracles passed away with the apostles. I have never read, either in sacred tory, any statement that would conremarkable work now being done in firm such a belief Indeed we would discredit God's Word to say so. The Apostle James wrote about sixty years after Christ, "The prayer of faith shall save the sick and the Lord shall raise him up." Again, "The effectual, terof a part of London, has attracted at- vent prayer of the righteous man tention on this side of the water. In availeth much." Besides this, the early life Miss Hill was a worker with Founder of our holy religion said. "Lo, I am with you alway, even to the end of the world." Has the world come to an end? full of tears.

"Lo, it is I! be not afraid!

This crust is my body broken for thee,

Hunself, his hungry neighbor and me."

"The Grail in my castle here is found,"

This was what the gentleman who had sent the book had written in his letter:

"My dear friend: "I am much interested in what you tell me of your school, and I send you a book to be given to your boys as a prize. I have always thought that the story of the Holy Grail, and the adventures of

King Arthur's knights in search of it, ought to be told to all young people; as to live always in their memories,

and be a spur to noble deeds. "James Russell Lowell's poem of Sir Launtal is, to my way of thinking,

the most beautiful and poetical setting which has ever been given to the fable and its moral. So I select that for the prize, and it is to be given to the boy who writes the best composition on the Sangreal."

When the teacher had read these Christ, saying to him: last words of the letter she laid it down on her table and looked around In many climes without avail the school room. In spite of herself a little smile came on her lips at the Echold, it is here-this cup which thou sight of the puzzled and bewildered faces. There were twenty-five boys in the room between the ages of ten The Holy Supper is kept indeed and fourteen. Not one of them In what so we share with another's need, looked as if he had the least Not what we give, but what we share, idea "what the letter had been

about. They had all listened intently, and were eager to know, for they had seen and handled the beautiful book, and had been told that it was a prize, sent to the school by the teacher's friend, and that they were all to try to win it.

"Those of you who know what the he said. work 'Sangreal' means, hold up your
