The Staff of Life in Danger.

Extreme care is necessary in purchasing baking powders to avoid those made from burnt alum; phosphatic or other harsh acids, of which there are innumerable brands in the market,

Great efforts are made to foist these inferior powders upon consumers by the inducement of a lower price and by grossly false representations as to their ingredients and comparative value.

Alum baking powders have been declared by the most competent authorities injurious to health. Therefore every precaution must be taken to keep them out of the food. They are sold under many names, and new brands are continually appearing.

It is safe to avoid the use of any new or doubtful brand until you have had it analyzed. The purity of any powder sold at a lower price than Royal may be suspected.

Royal is a pure cream of tartar baking powder and its exclusive use is the practical and positive safeguard against alum and the various adulterations found in other brands. It has been analyzed and recommended by the U. S. Government chemists, by the health officers of New York, Chicago, San Francisco, London, etc., and by eminent physicians and scientists generally, who give it the greatest praise for its marvelous purity and leavening strength.

The Royal powder costs only a fair price per pound, and is cheaper and better at its price than any similar article in the world.
